

# Natural Cosmetic Ingredients

## Exotic Oils

Conventional, Organic and Internally Stabilized

High Performance Delivered

# Exotic Oils

Exotic Oils are derived from uncontrolled plantations and unlikely places coming from jungles of Asia, Africa and South – Central America.

The word exotic is used to define clearly that these crops are dependent on geographical and seasonal variations, which has an impact on their yearly production performance.

Our selection of natural exotic oils are based upon our three decades of field experience and we are proud to boost the only PhD in exotics products.

Exotic Oils can be used in the following applications:

- ❖ Anti-aging and anti-wrinkle creams
- ❖ Sun Protection Factor SPF
- ❖ Softening and hydration creams
- ❖ Hair products
- ❖ Skin brightening applications

Our Internal Stabilization (I.S. ) technology extends the lifecycle of the products 20-30 times as compared to conventional and provides extreme stability to the final product

## ANDIROBA OIL

## Carapa Guaianensis Seed Oil
